

How will GFI MailArchiver® save your day?

Your archiving solution for productivity, management and compliance

Email is your biggest, most critical source of company information and you can't do business without it. Often, email messages are the only record you have of important transactions. Losing or deleting an important email or attachment can be the difference between a won or lost deal.

With GFI MailArchiver, all company emails are automatically filed centrally in a secure environment that can be accessed quickly and searched easily. Businesses have the peace of mind that vital company information stored in email is in a safe and manageable place. Furthermore, with MailInsights reports you can identify and resolve potential business issues such as security breaches, legal risks and productivity issues by extracting key data from your email archive.

Find lost emails

Limit liability, **improve compliance**

Identify business issues

BENEFITS

- » Help maximize compliance and minimize legal risk with a complete, tamper-proof archive of all company email
- » Improve productivity and reduce storage costs by eliminating need for PST files and keeping just one central copy of an email and its attachments
- » Improve mail server performance and benefit from unlimited mailbox size by maintaining your email history in a separate database
- » Avoid security breaches and manage employee productivity with MailInsights reports
- » Anytime, anywhere access to business critical emails, and their attachments, instantly via Outlook®, laptop, smartphone or tablet.

GFI MailArchiver™

Archiving for productivity, management and compliance

Managing your business-critical email history securely and efficiently

GFI MailArchiver works seamlessly with Exchange

GFI MailArchiver works in parallel with Exchange, without any impact on or risk to the way Exchange works. It leverages the journaling feature of Exchange Server, taking a copy of journaled emails and archiving them in a separate server. This separates archiving activities from the Exchange server activity of delivering email, allowing you to free up space and increase performance of your Exchange server, while providing excellent scalability and reliability for your archive store.

Reduce storage costs and end PST file issues

GFI MailArchiver keeps a copy of company emails in separate store, eliminating the need for users to archive their mail in PST files on local drives. Storage costs are significantly reduced as GFI MailArchiver uses single-instance storage (SIS) to store just one copy of an email sent to multiple recipients and compresses attachments, meaning storage requirements are considerably smaller when compared to keeping emails in the Exchange store.

Help with legal compliance and e-discovery

By allowing companies to archive all company email and set storage time frames, and by providing audit trail functionality, GFI MailArchiver helps organizations meet regulatory compliance requirements such as SOX or FOIA. Under these and other acts, public companies must prove that their internal controls and audit trails are sound and that their processes are capable of producing certifiably correct data.

Users enjoy faster email, 'unlimited mailbox', and anytime access to their email history

With GFI MailArchiver, user productivity is greatly improved. GFI MailArchiver's easily accessible central, stub-free archiving solution means Exchange server performance is faster and there is little need to impose mailbox size limits on the user. Integration with Outlook means users can have seamless real-time access to the central store alongside their current emails; IMAP access means users can also access the archive on the go from any IMAP-enabled client or device, including iPhone®, iPad® and Android™.

Configuring GFI MailArchiver is quick and easy

Identify business issues from data in your email archive with MailInsights reports

Your email history is your company's most important store of business critical information. GFI MailArchiver's MailInsights reporting module can help you identify potential security breaches, legal risks and productivity issues by extracting key data from your email archive:

- » Who are your users' most commonly emailed recipients?
- » Who is using their corporate account to send private email?
- » Who is fastest and slowest to respond to emails?
- » Who is using email storage for inappropriate files?
- » Who is using inappropriate language in emails?
- » Which users are emailing job search companies and recruiters?
- » Who is leaking information to your competitors?

Other features

- » Finding and restoring emails on request is quick and easy; GFI MailArchiver has full Unicode support, so you can fully index, search and retrieve emails and attachments in all languages
- » One-click restore of a single email to a mailbox
- » Access key information at a glance through a dynamic administrator dashboard
- » Migrate old PST files stored on client machines into the new GFI MailArchiver store
- » Set up email retention and categorization policies
- » Give viewing rights and exempt users from archiving email
- » Collect and archive emails from around the world in one geographical location
- » Restore mailboxes from the archive
- » Audit your archived email to ensure it has not been tampered with
- » Supports all major web browsers - Internet Explorer®, Firefox®, Google Chrome™ and Safari®.

System requirements

- » Windows® 2003 SP1/2008/2008 R2 or later
- » Windows SBS 2003 or later
- » Access to Microsoft® Exchange Server 2003/2007/2010
- » Microsoft .NET Framework 2.0
- » Internet Information Services (IIS) – world wide web service.
